PROFESSIONAL BACKGROUND

Data-driven Software Engineering student specializing in AI and automated pipeline development. Leveraged generative AI, prompt engineering, and machine learning to optimize workflows, cut operational costs, and build predictive systems

KEY PROJECTS

- | | |
|---|---------------------|
| Automated AI Semantic Vector Layer | May 2025 - Present |
| <ul style="list-style-type: none">Optimizing a 3D semantic vector space optimized via nightly Python cron-jobs, expanding model capacity to map entire human language while increasing semantic accuracy by 24% over a multi-month autonomous training cycle | |
| Subaru Lead Classification Demo | Mar 2026 - Mar 2026 |
| <ul style="list-style-type: none">Built a Python-based machine learning prototype using scikit-learn designed to process multi-variable dealership datasets and simulate predicting walking-buyer intent with an 87% target accuracy | |
| AI Token Optimization & Workflow Engine | Oct 2025 - Jan 2026 |
| <ul style="list-style-type: none">Created a Python-based orchestration system utilizing dual-model validation logic to reduce LLM API token consumption by 32% and minimize output hallucinations | |
| Automated Video Asset Synthesis Pipeline | Jul 2025 - Sep 2025 |
| <ul style="list-style-type: none">Developed a Python-based video generation pipeline integrating the Pexels API to combine stock and user-submitted footage for client Facebook ad campaigns, streamlining ad creative production and reducing manual editing by an estimated 70% | |

EXPERIENCE

- | | |
|---|---------------------------------------|
| UCCU | South Jordan, UT Aug 2025 - Present |
| Member Service Representative II | |
| <ul style="list-style-type: none">Guided an average of 15 customers weekly through loan application process, contributing to approximately 4 funded loans per weekUtilized Excel to execute complex income calculations and debt-to-income logic, while auditing high-volume branch transactions to ensure 100% precision in monetary data entry | |
| THE CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS | Chicago, IL May 2023 - May 2025 |
| Spanish Ads & AI Optimization Manager | |
| <ul style="list-style-type: none">Architected an automated AI feedback loop utilizing ChatGPT to optimize targeting and ad creative, reducing cost-per-conversion to \$4,000, outperforming organization's premium benchmark of \$10,000 by 60%Deployed generative AI tools to conduct market research and scale dynamic A/B testing variations, utilizing cross-cultural data segmentation to align campaigns with distinct Spanish-speaking demographics and expand weekly engagement by 35%Led a 6-person team utilizing prompt engineering and demographic segmentation, resolving critical Tableau and Meta Ads data mismatches to protect telemetry integrity | |

EDUCATION

- | | |
|---|-------------------------------|
| ENSIGN COLLEGE | Salt Lake City, UT May 2028 |
| Bachelor of Science-Software Engineering
Certificate-AI Full Stack Development | |
| HARVARDX | Online Aug 2026 |
| Certificate-Python for Data Science and Machine Learning
Certificate-Computer Science for Python Programming | |

SKILLS

Programming Languages: Python, JavaScript, SQL, HTML/CSS
AI & Machine Learning: APIs, Prompt Engineering, Dual-Model Validation Logic, Semantic Vector Modeling
Data Tools & Platforms: Salesforce, Microsoft Excel (Advanced Modeling), Tableau, Meta Ads Manager, Git/GitHub
Core Competencies: Technical Troubleshooting, Cross-Cultural Data Segmentation, Workflow Automation, Agile Team Leadership
