

# Ryan Sokolowsky

Draper, UT • (331) 298-3934 • [ryan.sokolowsky@gmail.com](mailto:ryan.sokolowsky@gmail.com) • <https://github.com/RSokolowskyDev>

**AI Solutions & Automation Engineer | Technical Analyst | Implementation Specialist**

## SUMMARY

AI-focused solutions engineer and software engineering student with experience automating business workflows, optimizing AI systems, and supporting regulated financial platforms. Proven ability to translate business needs into scalable technical solutions across finance, SaaS, and operations.

## TECHNICAL SKILLS

Python, JavaScript, SQL, Java, C++, Lua, React, Node.js, AWS (Lambda, S3, EC2), Firebase, Git/GitHub, Salesforce (REST API), AI Orchestration, Prompt Engineering, Automation Design, ArduPilot, Autonomous Drones, FIRST Tech Challenge (FTC), Android Studio, Tableau, Bilingual (Spanish), MS Office

## EXPERIENCE

**Utah Community Credit Union (UCCU)** — Herriman, UT  
*Member Service Representative (Technical & Process-Focused) | 2025 – Present*

- Troubleshoot multi-system account discrepancies across enterprise financial platforms
- Created structured Excel reports to streamline adviser-member workflows
- Acted as a technical liaison between members, advisers, and internal systems teams

**Church of Jesus Christ of Latter Day Saints** — Chicago, IL  
*Full-Time Missionary / Spanish Facebook Ads Lead | 2023 – 2025*

- Reduced cost per conversion by 25% through data-driven optimization
- Led and mentored a 16-person team, increasing engagement by 35%

**EOS Fitness** — Orem, UT  
*Assistant Fitness Manager | 2022 – 2023*

- Managed day-to-day membership sales operations, driving conversions and member retention
- Handled member escalations and resolved billing and account issues across internal systems

**Code Ninjas** — Hanover, MD  
*Lead Sensei (Lead Instructor) | May 2020 – May 2021*

- Instructed children in coding fundamentals and software development concepts in a structured learning environment
- Led sessions across multiple skill levels, adapting teaching approach to keep students engaged and progressing
- Served as the senior instructor on-site, supporting junior staff and maintaining curriculum quality

## EDUCATION

**Ensign College** — Salt Lake City, UT  
*Bachelor of Science, Software Engineering (In Progress) — Expected May 2028*

**PLTW Engineering Curriculum** (Software-Focused) —  
Computational Logic, Systems Modeling, Software-Driven Design | 2017 – 2021

## PROJECTS

### Sentinel — AI Token Optimization & Workflow Engine

- Built a Python-based orchestration system to optimize token usage across LLM APIs
- Implemented dual-model validation logic to improve output accuracy and reduce hallucinations

### ResumeGen — Automated Resume Generation System

- Developed a Python tool to dynamically generate resumes from structured JSON data
- Enabled modular tailoring of experience and project blocks for targeted job applications

### Automated Video Processing Pipeline

- Created a Python-based MoviePy pipeline for batch video processing
- Reduced manual editing time and enabled scalable content production

### Engineering Capstone — AI Paint Color Matcher

- Integrated sensor input with Create ML for real-time pigment prediction
- Built an inference pipeline to convert RGB values into accurate mixing ratios

### Semantic Universe Layer for AI Models

- Designed a glass-box semantic abstraction layer that enables transparent reasoning and efficient execution on lower-end hardware

### Autonomous Drone System — Ground-Up Build

- Built and configured a fully autonomous drone using ArduPilot, handling hardware integration and firmware-level compatibility across components
- Developed Lua scripts for flight logic and wrote C++ to resolve hardware incompatibilities and extend functionality

## CERTIFICATIONS

**Microsoft Excel Certification**

**CompTIA A+** (In Progress)

**AWS Cloud Practitioner** (In Progress)

**AI Full Stack Development** — Ensign College (In Progress)

**Computer Science for Artificial Intelligence** — HarvardX (In Progress)
